README Manifest

NewStart UK Documentation Pack v1.2

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

NewStart UK Documentation Pack v1.2

Version: v1.2

Date: May 2026

Contents

This pack contains 28 Markdown source files, 28 individual PDFs, 6 merged volume PDFs, 1 complete master PDF, and build-ready assets/prompts.

Document List

01. ****Strategic Blueprint v1.2**** - Vision, positioning, market logic, expansion path, and strategic guardrails
02. ****Product Strategy & MVP Definition v1.2**** - Locked MVP scope, exclusions, release boundaries, and success metrics
03. ****Student Settlement Checklist & Task Logic v1.2**** - Structured 90-day journey, task fields, reminders, dependencies, and scoring
04. ****Master Documentation Architecture**** - Document hierarchy, source-of-truth rules, volumes, and update control
05. ****Brand, Persona & Trust Identity Bible**** - Brand voice, Nia/NewStart Navigator, avatar rules, and trust identity
06. ****Trust, Safety & Compliance Playbook**** - Boundaries for sensitive guidance, disclaimers, escalation, and safety controls
07. ****Privacy, Data Protection & GDPR Readiness**** - Data minimisation, consent, retention, AI handling, and B2B privacy boundaries
08. ****Terms, Disclaimers & User Policy Pack**** - Draft user-facing policy structure and required disclaimers
09. ****UX Journey & Screen Map**** - User, admin, support, and future partner journeys
10. ****Visual Identity, Design System & UI Copy Guide**** - Brand look, interface language, components, and design-generation prompts
11. ****Vibe Coding Build Spec v1.0**** - Technical stack, routes, schema, components, APIs, sprints, and acceptance criteria
12. ****Checklist Rules Engine & Seed Data Spec**** - Task-generation conditions, sample JSON, readiness formula, and fallback logic
13. ****Analytics, Events & Product Metrics Spec**** - Event tracking, privacy-safe metrics, dashboards, and product intelligence
14. ****QA, Testing & Acceptance Criteria Manual**** - Feature tests, compliance tests, AI tests, mobile checks, and release gates
15. ****Deployment, DevOps & Environment Setup Guide**** - Hosting, environment variables, migrations, monitoring, backups, and release checklist
16. ****AI Governance & Prompt Manual**** - Document Helper, admin AI, compliance checker, refusal rules, and prompt templates
17. ****Content & Knowledge Base Operations Manual**** - Guidance pages, city packs, university packs, review workflows, and content templates
18. ****Source Library & Official Reference Register**** - Official source tracking, review dates, content ownership, and evidence rules
19. ****Multilingual & Accessibility Strategy**** - Plain English, translation, inclusive UX, and accessibility principles
20. ****Social Media, Acquisition & Community Growth Engine**** - Content-led growth, Hormozi-style loop, channel strategy, and launch calendar

21. ****SEO, Landing Page & Lead Magnet Strategy**** - Search content, conversion pages, downloadable assets, and waitlist funnel
22. ****Commercial, Partner & Revenue Operations Framework**** - B2C, B2B, affiliate, premium support, partner verification, and pricing logic
23. ****Ambassador, Referral & Community Programme**** - Student ambassadors, referral loops, community rules, and testimonial strategy
24. ****Pilot & Validation Playbook**** - User research, partner validation, prototype tests, success metrics, and decision gates
25. ****Customer Support & Escalation SOP**** - Support categories, response templates, escalation routes, and sensitive issue handling
26. ****Admin Operations Manual**** - Internal routines for content, users, checklist updates, AI review, partners, and reporting
27. ****Risk Register & Crisis Response Plan**** - Operational, compliance, AI, partner, social, and data incident response planning
28. ****B2B Sales, Proposal & Account Management Playbook**** - University, agent, employer, accommodation, and partner sales workflows

Recommended Starting Order for Vibe Coding

1. Product Strategy & MVP Definition v1.2
2. Student Settlement Checklist & Task Logic v1.2
3. Brand, Persona & Trust Identity Bible
4. Trust, Safety & Compliance Playbook
5. Privacy, Data Protection & GDPR Readiness
6. UX Journey & Screen Map
7. Visual Identity, Design System & UI Copy Guide
8. Vibe Coding Build Spec v1.0
9. Checklist Rules Engine & Seed Data Spec
10. QA, Testing & Acceptance Criteria Manual

Operating Rule

Do not let growth override trust. Do not let AI override compliance. Do not let design override clarity. Do not let B2B promises exceed the MVP.

End of document.

NewStart UK

Document 01

Volume 1 - Strategy & Product Foundation

Strategic Blueprint v1.2

Vision, positioning, market logic, expansion path, and strategic guardrails

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document is the parent strategic narrative for NewStart UK. It defines what NewStart UK is, why it matters, who it serves first, how it expands, and what must remain true as the product moves from idea to MVP to platform.

Executive Summary

NewStart UK is an AI-assisted UK arrival and settlement platform that helps newcomers settle faster, avoid costly mistakes, and complete essential first steps through personalised roadmaps, reminders, document guidance, local support, and trusted service recommendations.

The launch focus is international students because their first 90 days are urgent, structured, emotionally stressful, and commercially reachable through universities, education agents, student communities, accommodation providers, and faith/community networks. The long-term opportunity is wider: NewStart UK can serve skilled workers, health and care workers, dependants, families, visitors, employers, universities, agents, accommodation providers, relocation partners, charities, and community organisations.

Core Strategic Position

NewStart UK should not be framed as a student-only website. It should be framed as a UK newcomer onboarding platform, with international students as the first supported vertical.

One-line Positioning

NewStart UK helps people moving to the UK settle faster, avoid costly mistakes, and complete essential first steps through personalised checklists, reminders, AI document support, verified local guidance, and partner-backed onboarding services.

Strategic Principle

Start with students. Build for newcomers. Scale through institutions.

Problem Definition

People arriving in the UK face a dense set of early tasks: accommodation, banking, GP registration, transport, SIM setup, council tax awareness, work-readiness, documents, budgeting, local safety, and community integration. The issue is not only lack of information. The issue is that information is scattered, generic, not sequenced, and often discovered only after a mistake has occurred.

NewStart UK converts scattered settlement information into a guided settlement journey.

Strategic Product Pillars

Pillar	Meaning	Product Expression
Plan	Prepare before arrival	Pre-arrival checklist, document readiness, travel plan
Settle	Complete first steps	90-day checklist, reminders, progress tracking
Protect	Avoid costly mistakes	Scam alerts, mistake-prevention warnings, verified partners
Understand	Make documents clearer	Document Helper Lite, plain-English guidance, key-term explanation
Connect	Find safe support	Local guidance, partner marketplace, community links

Pillar	Meaning	Product Expression
Grow	Move beyond survival	Jobs, budgeting, housing stability, career and family support

Target Segment Roadmap

Phase	Segment	Primary Need	Commercial Route
1	International students	First 90-day settlement	B2C, universities, agents, student communities
2	Skilled workers	Work, NI, GP, housing, right-to-work support	Employers, recruiters, B2C
3	Health and care workers	Relocation, DBS, housing, local adaptation	Care agencies, NHS recruitment partners
4	Dependants and families	GP, schools, household setup, local integration	B2C, employers, community partners
5	Visitors and short-stay arrivals	Travel, safety, transport, accommodation	B2C, travel/service partners
6	B2B partners	Onboarding infrastructure	Licensing, pilots, white-label, managed service

Commercial Logic

NewStart UK should use layered monetisation rather than a single revenue stream.

- B2C plans for newcomers.
- Premium human support sessions.
- B2B licensing for universities, employers, agents, accommodation providers, and relocation partners.
- B2B2C distribution through institutions that give users access.
- Affiliate and referral revenue from trusted settlement-related services.
- White-label or co-branded onboarding portals for institutional clients.
- Anonymised insight reports where privacy rules and consent permit.

Competitive Advantage

The moat is not general information. The moat is structured personalisation and trust.

Key advantages:

- personalisation by arrival type, city, university, accommodation, and timeline;
- task dependency logic that tells users what to do first;
- scam and mistake-prevention intelligence;
- city and institution-specific guidance packs;
- transparent AI support with safe boundaries;
- verified partner marketplace;
- admin and partner dashboards;
- anonymised insights for institutions.

Strategic Guardrails

Guardrail	Meaning
Brand broad, MVP narrow	Public positioning can be broad, but MVP v1 must stay student-focused
Guidance, not regulated advice	The product explains and signposts; it does not act as lawyer, immigration adviser, doctor, financial adviser, or housing representative
Trust before monetisation	Affiliate revenue must never compromise user safety
AI assists, humans decide	AI can prepare, simplify, draft, triage, and explain; final actions remain user or human-led
Privacy by default	Collect only what is needed, minimise sensitive data, anonymise B2B reporting

Strategic Verdict

NewStart UK should start as a student settlement assistant, grow into a newcomer onboarding platform, and mature into AI-powered settlement infrastructure for the UK mobility ecosystem.

End of document.

NewStart UK

Document 02

Volume 1 - Strategy & Product Foundation

Product Strategy & MVP Definition v1.2

Locked MVP scope, exclusions, release boundaries, and success metrics

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines the exact MVP scope for NewStart UK. It exists to prevent overbuilding during vibe coding and to make sure the first version is useful, testable, safe, and commercially presentable.

MVP Name

NewStart UK for International Students.

MVP Description

A mobile-first web app that helps international students prepare for arrival, complete essential first steps, avoid common mistakes, and settle into the UK within their first 90 days.

MVP Goals

- Convert scattered settlement information into a personalised roadmap.
- Help users know what to do before arrival, on arrival day, during the first week, first month, and first 90 days.
- Reduce confusion around accommodation, SIM, university check-in, bank preparation, GP registration, council tax awareness, documents, transport, budgeting, and part-time work awareness.
- Create a technical foundation that later supports workers, families, visitors, partners, and AI operations.

MVP v1 In Scope

Feature	Description	Priority
Public landing page	Explain product and collect interest	High
Authentication	Email/password sign-up and login	High
Onboarding profile	Collect city, university, arrival date, accommodation, nationality, English level	High
Personalised roadmap	Generate tasks based on timeline and profile	Very High
Checklist dashboard	Show current stage, urgent tasks, progress, readiness score	Very High
Task detail pages	Explain what to do, why it matters, and risk warnings	High
Guidance library	Basic pages linked to tasks	High
Scam and mistake alerts	Static risk cards for housing, jobs, documents, banking, council letters	High
Reminder preferences	Email reminder settings and scheduled reminder records	Medium
Admin dashboard	Basic checklist/content management	High
Document Helper Lite	Controlled AI/plain-English helper as beta or placeholder	Medium

MVP v1 Out of Scope

Do not build the following in the first coding pass unless they are later promoted:

- Native iOS or Android app.
- Full storage of passport, visa, bank, or tenancy documents.
- Stripe payments.

- WhatsApp automation.
- Full partner dashboard.
- Full B2B reporting engine.
- Full marketplace transaction flow.
- Auto-submission of official forms.
- Legal, immigration, financial, tax, medical, or housing advice.
- Deep browser automation.
- Fully autonomous job application agent.

User Profile Fields

Field	Required	Notes
Full name	Yes	Can be changed in profile
Email	Yes	Used for login and reminders
Arrival type	Yes	MVP defaults to international student
Arrival status	Yes	Not arrived, arriving soon, arrived
Expected/actual arrival date	Yes	Used for stage calculation
City	Yes	Used for local guidance
University	Yes for student	Used for institution-specific tasks
Accommodation type	Yes	Private rental, university accommodation, family/friend, temporary, not secured
Nationality	Optional	Useful for feedback and future personalisation
English confidence level	Optional	Adjusts content simplicity and helper prompts
Interested in part-time work	Optional	Adds jobs/NI/right-to-work awareness tasks

MVP User Journey

1. User lands on homepage.
2. User joins waitlist or signs up.
3. User completes onboarding profile.
4. System calculates current journey stage.
5. System generates initial personalised tasks.
6. User sees dashboard with readiness score and urgent tasks.
7. User opens task details and guidance pages.
8. User marks tasks as complete or in progress.
9. User receives email reminders where enabled.
10. Admin updates tasks and guidance without code changes.

Success Metrics

Metric	Target for Pilot
Waitlist sign-ups	100+ relevant users or partner leads
Onboarding completion	70%+ of registered users
Task engagement	60%+ mark at least 3 tasks complete
Guidance page usage	50%+ open at least one guidance page

Metric	Target for Pilot
Student interviews	20+ completed
Partner conversations	5+ serious conversations
Repeat usage	30%+ return within 7 days

Definition of Done for MVP v1

MVP v1 is complete when a student can sign up, enter an arrival profile, receive a personalised 90-day roadmap, track progress, read guidance, see risk warnings, and when an admin can edit core checklist/content records without changing code.

Scope Control Rule

If a feature does not help the first student user complete the first 90-day settlement journey, it should be postponed unless it is required for trust, privacy, compliance, or basic operations.

End of document.

Student Settlement Checklist & Task Logic v1.2

Structured 90-day journey, task fields, reminders, dependencies, and scoring

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document converts the student settlement journey into product logic. It is the operational core of the NewStart UK MVP and should feed the database seed data, reminder system, guidance library, and user dashboard.

Journey Stages

Stage ID	Stage	Timeline	Purpose
PRE	Before Arrival	Before travel	Prepare documents, accommodation, money, route, and safety plan
D1	Arrival Day	First 24 hours	Safety, contactability, accommodation, rest
D7	First 7 Days	Days 1-7	University check-in, SIM, transport, orientation, urgent setup
D30	First 30 Days	Days 8-30	Bank, GP, council tax awareness, documents, budgeting
D90	Days 31-90	Stability period	Work-readiness, housing stability, wellbeing, community
GROW	Ongoing Growth	After day 90	Career, finance, housing renewal, family and long-term support

Task Data Model

Each task should be represented with the following fields.

Field	Example	Notes
task_id	STU_BANK_001	Stable ID for code and analytics
title	Prepare for UK bank account setup	User-facing title
stage	D30	Linked to journey stage
category	Money	Documents, Accommodation, Health, University, Work, Safety, Local Life, Growth
priority	High	Low, Medium, High, Very High
required	true	Whether it affects readiness score
condition	student AND arrived	Rule that determines visibility
dependency_ids	STU_UNI_003	Tasks that should happen first
reminder_trigger	arrival_date + 10 days	Used by reminder system
guidance_slug	student-bank-account-prep	Linked guidance article
risk_warning	Do not pay anyone to open an account for you	Safety note
source_required	true	Needs official/verified source review
ai_helper_allowed	true	Can Document Helper assist?
escalation_flag	false	Should human review be suggested?
admin_editable	true	Can admin update without code?

Core Task Categories

Category	Example Tasks
Documents	Passport, visa/eVisa notes, university letter, tenancy, bank letters
Accommodation	Contract, deposit, condition photos, utilities, landlord checks
Money	Bank account, budget, emergency fund, money transfer
Health	GP, NHS basics, medication, wellbeing support

Category	Example Tasks
University	Enrolment, student ID, status letter, support services
Work	NI number, right to work, CV, job search, scams
Transport	Airport route, bus/train, student discounts
Safety	Emergency contacts, scam warnings, document protection
Local Life	Supermarkets, communities, city guide, cultural support
Growth	Career, budgeting, confidence, long-term planning

Critical Path Logic

The app should not show a flat list only. It should show what unlocks other tasks.

Bank Account Chain

1. Confirm UK address.
2. Get student status/enrolment letter if required.
3. Prepare passport/visa/eVisa evidence.
4. Compare suitable account options through neutral guidance.
5. Apply through official provider channel.
6. Save confirmation.

GP Registration Chain

1. Confirm term-time address.
2. Find local GP options.
3. Prepare ID/student proof where requested.
4. Complete registration form.
5. Save confirmation.

Council Tax Awareness Chain

1. Confirm accommodation type.
2. Confirm full-time student status.
3. Get student status letter if needed.
4. Identify local council.
5. Submit exemption evidence where required.
6. Do not ignore council letters.

Part-Time Work Chain

1. Understand work conditions from official/university sources.
2. Prepare CV.
3. Learn job scam signs.
4. Get/share right-to-work evidence where needed.
5. Apply for NI number if eligible/needed.
6. Track applications.

Reminder Schedule

Timing	Reminder Purpose
30 days before arrival	Start document and accommodation readiness
14 days before arrival	Confirm travel and first-night plan
7 days before arrival	Prepare airport route and emergency contacts
3 days before arrival	Save offline copies of key documents
Day 1	Confirm accommodation and mobile connection
Day 3	Complete university check-in
Day 5	Start bank and GP preparation
Day 7	Review first-week progress
Day 14	Follow up bank, GP, and council tasks
Day 30	Complete settlement stability review
Day 60	Check job, budget, and housing progress
Day 90	Generate settlement review

Readiness Score Weights

Area	Weight
Documents ready	15%
Accommodation stable	15%
University setup complete	15%
Banking/finance setup	15%
Health setup	10%
Council/local admin	10%
Work-readiness	10%
Safety/scam awareness	5%
Community/wellbeing	5%

First Guidance Pages

The first content library should include: Before You Arrive, First 24 Hours, UK Accommodation, Housing Scam Warning, Student Bank Account Preparation, Registering with a GP, NHS Basics, Council Tax Student Exemption Basics, Student Status Letter, SIM/eSIM, UK Transport, First Month Budgeting, Tenancy Documents, Deposit Checks, Part-Time Work Awareness, NI Number Basics, Right-to-Work/Share Code Basics, Job Scam Warning, Emergency Contacts, and First 90-Day Review.

End of document.

NewStart UK

Document 04

Volume 1 - Strategy & Product Foundation

Master Documentation Architecture

Document hierarchy, source-of-truth rules, volumes, and update control

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document is the control centre for the NewStart UK documentation system. It explains how the 28 documents relate, which documents override others, and how future updates should be managed.

Pack Structure

The v1.2 documentation pack contains 28 logical documents, grouped into six volumes.

Volume	Focus	Documents
Volume 1	Strategy & Product Foundation	1-4
Volume 2	Brand, Trust & Legal Safety	5-8
Volume 3	UX, Build & Technical Delivery	9-15
Volume 4	AI, Content & Knowledge Operations	16-19
Volume 5	Growth, Community & Commercial Engine	20-23
Volume 6	Operations, Pilot & Scale	24-28

Source-of-Truth Hierarchy

When documents conflict, use this order.

Authority Level	Document	Rule
1	Trust, Safety & Compliance Playbook	Overrides all unsafe, overclaiming, or regulated-advice content
2	Privacy, Data Protection & GDPR Readiness	Overrides data collection, analytics, AI logging, and B2B reporting conflicts
3	Product Strategy & MVP Definition	Controls MVP scope and release boundaries
4	Student Settlement Checklist & Task Logic	Controls intended user journey
5	Checklist Rules Engine & Seed Data Spec	Controls implementation of checklist logic
6	Brand, Persona & Trust Identity Bible	Controls tone, persona, and trust positioning
7	Visual Identity, Design System & UI Copy Guide	Controls visual and interface implementation
8	Vibe Coding Build Spec	Controls technical construction within scope

Cross-Reference Rules

- Marketing documents must obey compliance and product-scope documents.
- AI prompts must obey trust, privacy, and disclaimer documents.
- B2B sales materials must not promise features beyond MVP or roadmap status.
- Analytics must obey privacy and data minimisation rules.
- Social media claims must obey brand, compliance, and source-review standards.
- Partner recommendations must obey affiliate disclosure and verification standards.

Document Update Policy

Every material update should include:

- version number;
- date;
- owner or editor;

- reason for update;
- affected documents;
- conflict check completed or not;
- next review date.

Recommended Review Cycle

Document Type	Review Frequency
Compliance, privacy, terms	Before launch and quarterly thereafter
Source register	Monthly or whenever official rules change
Checklist tasks	Monthly during pilot
Social/content strategy	Weekly during launch
Build spec and QA	Each sprint
Commercial/pricing	Monthly during early validation
Strategic blueprint	Quarterly

Conflict Resolution Examples

Conflict	Resolution
Social content says "guaranteed council tax exemption"	Compliance wins; change to general guidance and source-backed wording
Build spec adds passport upload	Privacy doc wins; postpone until secure storage and policy are ready
B2B deck promises partner dashboards in MVP	MVP definition wins; label as roadmap feature
AI prompt gives immigration decision	AI governance and compliance override; refuse and signpost

Operating Principle

The documentation system should make NewStart UK buildable, safe, marketable, and scalable without allowing ambition to outrun trust or delivery reality.

End of document.

NewStart UK

Document 05

Volume 2 - Brand, Trust & Legal Safety

Brand, Persona & Trust Identity Bible

Brand voice, Nia/NewStart Navigator, avatar rules, and trust identity

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK should feel, speak, behave, and show up publicly. It governs the brand voice, persona, avatar use, human trust layer, and public-facing tone.

Brand Essence

NewStart UK should feel like a calm, practical, protective companion for people starting life in the UK.

Brand Promise

We help you know what to do next.

Brand Personality

Trait	Meaning
Calm	Avoid panic, fear, and alarmist wording
Practical	Give clear next steps, not vague motivation
Protective	Warn users about scams and costly mistakes
Respectful	Do not patronise newcomers
Plain-English	Make unfamiliar systems understandable
Trust-first	Never sacrifice user safety for growth or revenue
Modern	Feel digital, clean, and mobile-first

Brand Voice Rules

Use language that is:

- simple but not childish;
- reassuring but not overpromising;
- warm but not casual to the point of unseriousness;
- practical and action-oriented;
- culturally sensitive;
- compliance-aware.

Avoid

- "Guaranteed" outcomes.
- Fearmongering.
- Fake urgency.
- Pretending to be official government, NHS, university, or legal authority.
- Overusing AI hype.
- Complex legal or bureaucratic language unless explained.

Corporate Persona

The recommended persona is:

Nia - The NewStart Navigator

Nia is an AI-assisted guide created by NewStart UK to provide general settlement guidance, checklist support, document explanation, and next-step suggestions.

Nia can appear in:

- app onboarding;
- checklist prompts;
- email reminders;
- short explainer videos;
- Document Helper Lite;
- social media content;
- support triage messages.

Persona Disclosure

Use this disclosure wherever appropriate:

"Nia is an AI-assisted guide created by NewStart UK to provide general settlement guidance and checklist support. Nia does not provide legal, immigration, financial, tax, medical, or housing advice."

Avatar and Digital Twin Rules

AI avatars may be used for scalable education, but must not be deceptive.

Allowed	Not Allowed
Clearly labelled AI guide	Fake founder or fake adviser
General explainers	Legal/immigration/medical advice delivery
Checklist reminders	Pretending to have lived experience
Social video presenter	Pretending to be a student or government official
Multilingual guidance summaries	Undisclosed sponsored recommendations

Human Trust Layer

NewStart UK should not rely on AI persona alone. It should include:

- founder/operations voice;
- student ambassadors;
- community partners;
- verified partner organisations;
- real testimonials where consent is given;
- human escalation for sensitive support issues.

Trust Signals

Use trust signals consistently:

- "general guidance, not regulated advice";

- source-backed guidance;
- partner verification;
- clear affiliate disclosure;
- privacy-first design;
- human escalation where needed;
- user control over data.

Brand Copy Examples

Context	Preferred Copy
Dashboard greeting	Welcome back. Here are the next steps that matter most today.
Risk warning	Before you pay a deposit, check the provider and keep written evidence.
Sensitive guidance	This is general guidance only. For official advice, use the relevant official source or a qualified professional.
Completion	Good progress. You have completed another important step in your settlement journey.

Final Brand Rule

NewStart UK should feel like trusted arrival support - not a gimmick, not a fake adviser, and not a hard-selling marketplace.

End of document.

NewStart UK

Document 06

Volume 2 - Brand, Trust & Legal Safety

Trust, Safety & Compliance Playbook

Boundaries for sensitive guidance, disclaimers, escalation, and safety controls

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines the safety and compliance boundaries for NewStart UK. It must override marketing, AI, content, support, partner, and product decisions whenever user safety or regulated-advice risk is involved.

Core Rule

NewStart UK provides general settlement guidance, checklist support, document explanation, reminders, and signposting. It does not provide legal, immigration, financial, tax, medical, or housing advice.

Prohibited Claims

NewStart UK must not claim to:

- guarantee bank account approval;
- guarantee council tax exemption;
- determine immigration eligibility;
- provide legal advice;
- provide immigration advice;
- provide financial or tax advice;
- provide medical diagnosis or treatment;
- represent users in housing disputes;
- act as a government, university, NHS, council, or legal authority;
- submit official forms without explicit user action and appropriate safeguards.

Required Disclaimer

Use this default disclaimer on sensitive pages:

"NewStart UK provides general settlement guidance, checklist support, document explanation, and signposting. We do not provide legal, immigration, financial, tax, medical, or housing advice. For official or regulated matters, please use official sources or speak to a qualified professional."

Sensitive Topic Boundaries

Topic	Allowed	Not Allowed
Immigration/eVisa/share code	Explain what a share code is and signpost	Decide eligibility or interpret visa conditions as final advice
Council tax	Explain general student exemption concepts and signpost	Guarantee exemption or tell user they are definitely liable/not liable
GP/NHS	Explain registration and signpost NHS	Diagnose symptoms or give medical advice
Banking	Explain document preparation and safety	Recommend a regulated financial product as "best" without disclosure
Housing	Explain tenancy terms and scam warnings	Give legal advice or represent disputes
Work	Explain general right-to-work awareness	Tell user exactly what work they are legally permitted to do without official verification

Escalation Rules

Escalate or signpost when:

- user has a legal deadline;
- user may lose housing;
- user received a formal council/legal letter they do not understand;
- user asks about immigration eligibility or visa conditions;
- user reports exploitation, abuse, threats, or fraud;
- user asks for medical diagnosis;
- user wants to submit an official form;
- AI confidence is low;
- content source is outdated or unclear.

Scam and Harm Prevention

The app should warn users about:

- fake landlords;
- fake job offers;
- deposit pressure;
- payment requests before verification;
- fake agents;
- fake official websites;
- document phishing;
- people charging to open bank accounts or guarantee jobs;
- requests for bank login details or one-time codes.

Affiliate and Partner Safety

Affiliate revenue must never compromise user safety.

Rules:

- disclose paid relationships;
- do not rank purely by commission;
- vet partners before promotion;
- keep complaint records;
- remove partners with repeated serious complaints;
- never imply a partner is official unless they are.

AI Safety Rule

AI can simplify, explain, draft, and signpost. AI must not decide, guarantee, diagnose, represent, or submit sensitive official actions.

Compliance Review Triggers

Content requires review when it includes:

- visa or right-to-work wording;
- council tax obligations;
- health/medical references;
- financial product references;
- tenancy/legal rights;
- partner claims;
- user data collection;
- AI output used in sensitive workflows.

Final Safety Principle

If growth, convenience, automation, or revenue conflicts with user safety, user safety wins.

End of document.

Privacy, Data Protection & GDPR Readiness

Data minimisation, consent, retention, AI handling, and B2B privacy boundaries

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines NewStart UK privacy and data protection principles for MVP planning. It is not a substitute for legal review, but it sets the product direction before coding.

Privacy Principle

Collect the minimum data needed to generate useful settlement guidance. Avoid collecting or storing sensitive documents until security, legal review, and operational controls are mature.

MVP Data Categories

Data	Purpose	Sensitivity	MVP Handling
Name and email	Account and reminders	Personal	Store securely
Arrival date/status	Generate stage and reminders	Personal	Store securely
City and university	Personalise guidance	Personal	Store securely
Accommodation type	Personalise tasks and warnings	Personal	Store securely
Nationality	Future insights/personalisation	Sensitive-adjacent	Optional
English level	Simplify content	Personal	Optional
Task completion	Progress tracking	Behavioural	Store securely
Document text snippets	Document Helper	Potentially sensitive	Avoid storage by default; log minimal metadata
Uploaded documents	Full vault	Sensitive	Out of MVP scope

Document Storage Policy

For MVP v1, use document checklist/vault-lite only.

Allowed:

- users can track whether they have documents;
- users can read document preparation guidance;
- users may paste non-sensitive text for explanation if AI feature is enabled.

Not allowed in MVP v1:

- storing passport images;
- storing visa/BRP images;
- storing bank letters;
- storing full tenancy contracts;
- storing medical letters;
- storing official documents unless security, consent, and retention controls are implemented.

Consent Requirements

The product should ask for clear consent where relevant:

- email reminders;
- optional nationality or English-level collection;

- AI document helper use;
- analytics cookies beyond essential;
- sharing identifiable progress with a university/partner;
- marketing emails;
- affiliate/partner referrals where tracked.

B2B Dashboard Privacy

Default B2B reporting should be anonymised and aggregated.

Do not share identifiable user progress with partners unless:

- the user clearly opts in;
- the purpose is specific;
- the user can withdraw consent;
- the partner has appropriate data handling terms.

Retention Principles

Data Type	Suggested Retention
Account data	Until account deletion or inactivity policy applies
Reminder logs	12 months or less unless needed
Task completion data	While account is active
AI helper metadata	Short retention; avoid storing full sensitive text
Support tickets	Defined retention, with deletion pathway
Analytics	Aggregated where possible

Admin Access Rules

- Use role-based access.
- Limit access to user data by need.
- Log admin access to sensitive records.
- Avoid exposing raw AI document inputs to general admins.
- Use separate admin roles for content, support, and super admin.

User Rights Readiness

The app should be designed to support:

- access request;
- correction request;
- deletion request;
- export request;
- marketing opt-out;
- reminder opt-out;
- account closure.

Privacy-by-Design Checklist

- Do not ask for unnecessary data.
- Make optional fields clearly optional.
- Explain why data is requested.
- Do not store sensitive document uploads in MVP.
- Keep AI logs minimal.
- Separate analytics from identifiable user data where possible.
- Use secure hosting, authentication, and database access controls.

Final Privacy Rule

If a feature requires sensitive data but does not materially improve the first MVP settlement journey, postpone it.

End of document.

NewStart UK

Document 08

Volume 2 - Brand, Trust & Legal Safety

Terms, Disclaimers & User Policy Pack

Draft user-facing policy structure and required disclaimers

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document provides the user-facing policy structure for NewStart UK. It is a drafting foundation and should be reviewed by a qualified professional before public launch.

Policy Documents Needed

NewStart UK should prepare:

1. Terms of Use.
2. Privacy Policy.
3. Cookie Policy.
4. AI Use Disclaimer.
5. Affiliate and Partner Disclosure.
6. Support Limitation Policy.
7. Community Guidelines, if community features launch.
8. Refund Policy, if paid plans launch.

Master Disclaimer

"NewStart UK provides general settlement guidance, checklist support, document explanation, and signposting. We do not provide legal, immigration, financial, tax, medical, or housing advice. For official or regulated matters, please use official sources or speak to a qualified professional."

AI Disclaimer

"Some NewStart UK features may use AI to simplify wording, explain general concepts, draft checklist-style guidance, or suggest next steps. AI outputs may be incomplete or inaccurate and should not be treated as official advice. Sensitive decisions should be checked with official sources or qualified professionals."

Affiliate Disclosure

"Some providers may pay NewStart UK a referral fee or commission. We only aim to recommend services that match user needs, and users remain free to choose another provider. Paid relationships do not make a provider official or guaranteed."

Partner Disclaimer

"NewStart UK may list or signpost partner services. Unless clearly stated, partners are independent organisations. Users should review terms, pricing, eligibility, and suitability before using any external service."

Support Limitation Wording

"NewStart UK support can help explain how to use the platform and understand general settlement steps. We cannot make legal, immigration, financial, medical, tax, or housing decisions for users."

Terms of Use Outline

- Acceptance of terms.
- Service description.
- Account registration.
- User responsibilities.
- Guidance-only limitation.
- AI feature limitations.
- Prohibited misuse.
- External links and partners.
- Paid services, if applicable.
- Changes to service.
- Liability limitations.
- Termination.
- Contact information.

Privacy Policy Outline

- Who controls the data.
- What data is collected.
- Why data is collected.
- Legal basis to process data.
- How long data is stored.
- Who data may be shared with.
- AI and analytics processing.
- User rights.
- Security measures.
- Contact route.

Community Guidelines Outline

If social/community features launch, users must not:

- post scams;
- offer fake jobs or accommodation;
- request payment outside approved channels;
- impersonate officials;
- harass users;
- give regulated advice while posing as an expert;
- share another person's private documents.

Launch Rule

Do not launch paid, AI, partner, community, or document-helper features publicly until the relevant policy wording is visible and aligned with actual product behaviour.

End of document.

UX Journey & Screen Map

User, admin, support, and future partner journeys

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document maps the product experience screen by screen. It should guide design, frontend build, acceptance testing, and vibe-coding prompts.

Primary User Journey

1. Landing Page

Goal: explain the product and convert the visitor into waitlist or signup.

Key elements:

- headline;
- student-first value proposition;
- problem summary;
- feature preview;
- trust disclaimer;
- waitlist CTA;
- partner CTA.

2. Sign Up / Login

Goal: create secure access.

Fields:

- email;
- password;
- confirmation;
- optional Google login later.

3. Onboarding Profile

Goal: gather the minimum data needed to generate the roadmap.

Screens:

1. What brings you to the UK?
2. Are you an international student?
3. Arrival date/status.
4. City and university.
5. Accommodation type.
6. Nationality and English confidence, optional.
7. Work interest, optional.
8. Confirmation screen.

4. Dashboard

Goal: show what matters today.

Components:

- welcome message;
- current stage badge;
- UK Readiness Score;
- urgent tasks;
- upcoming reminders;
- progress bar;
- scam alert card;
- buttons: Continue checklist, View guidance, Ask Document Helper, Edit profile.

5. Checklist Page

Goal: help user work through tasks.

Filters:

- stage;
- category;
- priority;
- status;
- urgent only.

Task card should show:

- task title;
- priority;
- due timing;
- category;
- dependency warning;
- completion toggle.

6. Task Detail Page

Goal: explain what to do and why.

Sections:

- task summary;
- why this matters;
- what to prepare;
- common mistakes;
- source/signposting note;
- related guidance;
- mark as complete;
- ask for help.

7. Guidance Library

Goal: provide plain-English guidance articles.

Filters:

- documents;
- accommodation;
- money;
- health;
- university;
- work;
- safety;
- local life.

8. Document Helper Lite

Goal: simplify non-sensitive text and explain forms.

Flow:

1. User sees disclaimer.
2. User chooses document type.
3. User pastes text or selects sample/template.
4. AI explains in plain English.
5. AI highlights possible missing fields.
6. AI signposts when professional/official help is needed.

9. Reminder Settings

Goal: control communication.

Fields:

- email reminders on/off;
- reminder frequency;
- weekly digest;
- urgent reminders;
- marketing emails separate.

10. Support / Contact

Goal: route user appropriately.

Categories:

- account issue;
- checklist question;
- document confusion;
- housing concern;
- partner complaint;
- scam concern;

- other.

Admin Journey

Admin screens:

- admin login;
- dashboard overview;
- user summary;
- checklist template manager;
- task editor;
- guidance content manager;
- city/university pack manager;
- scam alert manager;
- support queue;
- analytics overview;
- partner placeholder manager.

Future Partner Journey

Partner screens are not MVP v1, but should be designed for future:

- partner login;
- cohort overview;
- anonymised issue trends;
- custom guidance content;
- referral metrics;
- support escalation summaries.

UX Principles

- Mobile-first.
- One primary action per screen.
- Use plain English.
- Always show what to do next.
- Use warnings carefully, not fearfully.
- Keep sensitive disclaimers visible but not overwhelming.
- Let users complete progress quickly.

End of document.

Visual Identity, Design System & UI Copy Guide

Brand look, interface language, components, and design-generation prompts

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK should look and sound in product interfaces, PDFs, landing pages, social content, and future mobile/PWA screens.

Design Direction

NewStart UK should feel like modern civic-tech plus friendly student support plus calm fintech-style dashboard.

It should not feel like:

- a government clone;
- a childish student app;
- an AI gimmick;
- a hard-selling affiliate site;
- a legal advisory service.

Visual Personality

Attribute	Direction
Calm	Soft backgrounds, clear spacing, non-alarmist warnings
Trustworthy	Structured layouts, source notes, restrained colour use
Helpful	Checklist cards, next-step guidance, progress indicators
Human	Warm illustrations or avatar use, not cold dashboards only
Modern	Rounded cards, clean typography, responsive mobile interface

Suggested Colour Tokens

Token	Use	Suggested Hex
primary	Main buttons, active states	#0B7285
primary_dark	Headers, trust anchors	#102A43
accent	Highlights, progress	#2F9E44
warning	Caution cards	#F08C00
danger	Serious warnings	#C92A2A
background	App background	#F8FAFC
card	Cards/panels	FFFFFF
border	Dividers	#D9E2EC
muted_text	Secondary text	#627D98

Typography Direction

Use a clean sans-serif system. Recommended web stack:

- Inter, Geist, or system-ui.
- Clear hierarchy.
- Avoid decorative fonts.
- Body copy should be easy to read on mobile.

Component Library

Core components:

- primary button;
- secondary button;
- checklist card;
- task detail card;
- warning card;
- guidance article card;
- readiness score widget;
- stage progress tracker;
- reminder settings panel;
- document helper panel;
- admin table;
- empty state;
- success message;
- source/disclaimer box.

UI Copy Style

Use action-oriented copy.

Context	Good Copy
Dashboard heading	Your next steps for today
Empty tasks	You are up to date for this stage. Review upcoming tasks.
Warning	Before paying a deposit, check the provider and keep written evidence.
Completion	Task completed. Your readiness score has been updated.
Document Helper	Paste non-sensitive text you want explained in plain English.
Disclaimer	This is general guidance, not regulated advice.

Accessibility Principles

- Maintain colour contrast.
- Do not rely on colour alone to show warning states.
- Use large tap targets.
- Use simple language.
- Ensure screen reader labels on forms.
- Make progress visible in text and graphics.
- Keep PDF exports readable in black and white.

PDF Style Direction

Documentation PDFs should use:

- clean cover page;

- consistent footer;
- clear section hierarchy;
- readable tables;
- callout boxes;
- restrained colour accents;
- page numbers;
- document version and date.

Design Generation Prompt

Use this prompt when asking an AI design tool to generate screens:

Design a mobile-first NewStart UK screen using a calm civic-tech + friendly student support + fintech dashboard style. Use s

Final Design Rule

Clarity is more important than decoration. Users should always know what to do next.

End of document.

Vibe Coding Build Spec v1.0

Technical stack, routes, schema, components, APIs, sprints, and acceptance criteria

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This is the primary developer-facing build document. It should be given to a coding agent or developer before starting implementation.

Recommended Stack

Layer	Recommendation
Frontend	Next.js App Router
Styling	Tailwind CSS + shadcn/ui
Auth	Supabase Auth
Database	Supabase Postgres
Email	Resend
AI	OpenAI-compatible API later
Hosting	Vercel
Storage	Supabase Storage later, not MVP v1 for sensitive docs
Payments	Stripe later, not MVP v1

Core App Routes

Route	Purpose
/	Landing page
/signup	User registration
/login	Login
/onboarding	Arrival profile setup
/dashboard	Student dashboard
/checklist	Checklist list and filters
/tasks/[id]	Task detail
/guides	Guidance library
/guides/[slug]	Guidance article
/document-helper	Document Helper Lite beta/placeholder
/settings	Reminder/profile settings
/support	Support/contact
/admin	Admin dashboard
/admin/tasks	Task template manager
/admin/guides	Guidance content manager
/admin/users	User overview

Recommended Folder Structure

```
/app
  /(public)
  /(auth)
  /(student)
  /admin
/components
  /ui
  /dashboard
  /checklist
  /guidance
  /admin
/lib
  supabase.ts
```

```
checklist-engine.ts
readiness-score.ts
reminders.ts
permissions.ts
/data
  seed-tasks.json
  seed-guides.json
/types
  index.ts
```

Database Tables

Minimum MVP tables:

- profiles
- arrival_profiles
- checklist_tasks
- user_tasks
- guidance_pages
- reminders
- scam_alerts
- admin_users
- support_tickets
- event_logs

Future tables:

- partners
- partner_categories
- subscriptions
- payments
- organisation_accounts
- cohorts
- ai_interactions

Core Build Sequence

Sprint 1 - Foundation

- Create Next.js app.
- Configure Tailwind and shadcn/ui.
- Set up Supabase Auth.
- Create landing page.
- Create login/signup.
- Create protected dashboard shell.

Sprint 2 - Onboarding

- Build onboarding profile form.
- Save arrival profile.

- Calculate journey stage from arrival date/status.
- Redirect user to dashboard.

Sprint 3 - Checklist Engine

- Create checklist seed data.
- Generate user_tasks from checklist_tasks.
- Build checklist page.
- Build task detail page.
- Mark complete/in progress/not started.
- Calculate readiness score.

Sprint 4 - Guidance and Warnings

- Create guidance library.
- Link tasks to guides.
- Add scam alert cards.
- Add disclaimer components.

Sprint 5 - Admin MVP

- Admin role check.
- Task template CRUD.
- Guidance page CRUD.
- Basic user/task analytics.

Sprint 6 - Reminders and Polish

- Reminder preferences.
- Email reminder records.
- Resend integration.
- Mobile UI polish.
- QA and deployment.

API/Action Requirements

Use server actions or API routes for:

- create/update arrival profile;
- generate checklist;
- update user task status;
- fetch dashboard summary;
- admin create/update task template;
- admin create/update guide;
- create support ticket;
- send reminder email.

MVP Acceptance Criteria

- User can sign up and log in.
- User can complete onboarding.
- User receives tasks based on arrival stage and profile.
- User can mark tasks complete.
- Dashboard readiness score updates.
- Task detail pages show guidance, warnings, and disclaimer.
- Admin can edit task templates and guidance.
- App is usable on mobile.
- No sensitive document upload is required.
- No feature claims to provide regulated advice.

Vibe Coding Master Instruction

Build the MVP in disciplined phases. Do not add future features unless explicitly requested. Prioritise clean data models, mobile-first UX, safe copy, and editable admin content.

End of document.

Checklist Rules Engine & Seed Data Spec

Task-generation conditions, sample JSON, readiness formula, and fallback logic

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document converts the 90-day checklist into machine-readable rules and seed data for the MVP.

Rules Engine Inputs

Input	Source	Use
arrival_type	Onboarding	MVP defaults to student
arrival_status	Onboarding	Determines stage
arrival_date	Onboarding	Calculates timeline
city	Onboarding	Local guidance
university	Onboarding	University tasks
accommodation_type	Onboarding	Housing tasks and warnings
english_level	Onboarding	Content simplicity
interested_in_work	Onboarding	Work/NI/right-to-work tasks

Stage Calculation

If user has not arrived, stage = PRE.

If arrival date is today or 1 day ago, stage = D1.

If days since arrival is 1-7, stage = D7.

If days since arrival is 8-30, stage = D30.

If days since arrival is 31-90, stage = D90.

If days since arrival is greater than 90, stage = GROW.

Task Visibility Logic

A task should appear when:

- user type matches;
- stage is current or earlier incomplete;
- conditions match profile;
- dependencies are completed or task is marked as preparatory;
- task is active.

Sample Task JSON

```
{
  "task_id": "STU_HEALTH_001",
  "title": "Register with a GP near your university or term-time address",
  "stage": "D30",
  "category": "Health",
  "priority": "Very High",
  "required": true,
  "condition": "arrival_type == 'student' && days_since_arrival >= 1",
  "dependency_ids": ["STU_PROFILE_001"],
  "reminder_trigger": "arrival_date + 10 days",
  "guidance_slug": "how-to-register-with-a-gp",
  "risk_warning": "Do not wait until you are ill before learning how to access GP services.",
  "source_required": true,
  "ai_helper_allowed": true,
  "escalation_flag": false,
  "admin_editable": true
}
```

Seed Task Minimum Set

MVP should seed at least 40 tasks across:

- pre-arrival;
- arrival day;
- first week;
- first month;
- days 31-90;
- ongoing growth.

Required Starter Tasks

Task ID	Title	Stage	Category
STU_PRE_001	Confirm university enrolment instructions	PRE	University
STU_PRE_002	Confirm accommodation and first-night plan	PRE	Accommodation
STU_PRE_003	Prepare key document copies	PRE	Documents
STU_PRE_004	Plan airport-to-accommodation route	PRE	Transport
STU_D1_001	Confirm arrival safely	D1	Safety
STU_D1_002	Reach accommodation safely	D1	Accommodation
STU_D7_001	Complete university check-in	D7	University
STU_D7_002	Set up UK SIM/eSIM	D7	Local Life
STU_D30_001	Prepare for bank account setup	D30	Money
STU_D30_002	Register with a GP	D30	Health
STU_D30_003	Understand council tax student exemption basics	D30	Local Admin
STU_D90_001	Review budget after first month	D90	Money
STU_D90_002	Complete 90-day settlement review	D90	Growth

Readiness Score Formula

Each required task contributes to category completion. Category completion is multiplied by category weight.

Pseudo-formula:

$$\text{readiness_score} = \text{sum}(\text{category_completion_percentage} * \text{category_weight})$$

Fallback Behaviour

If user has missing profile data:

- show general student checklist;
- ask user to complete missing fields;
- avoid hiding safety-critical tasks;
- use default UK-wide guidance.

Admin Controls

Admins should be able to:

- activate/deactivate a task;
- change priority;
- change stage;
- update guidance slug;
- add risk warning;
- mark source review needed;
- set AI helper allowed or not.

Rule Safety

Any task involving legal/immigration/financial/tax/medical/housing implications must include disclaimer and source-required flag.

End of document.

Analytics, Events & Product Metrics Spec

Event tracking, privacy-safe metrics, dashboards, and product intelligence

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines what NewStart UK should measure to improve the product, validate demand, support B2B reporting, and feed the social/content engine.

Analytics Principle

Track useful behaviour, not unnecessary personal detail. Analytics must obey privacy and data minimisation rules.

Core Events

Event	Trigger	Purpose
landing_viewed	Page visit	Measure interest
waitlist_submitted	Waitlist form completed	Demand validation
signup_started	User begins registration	Funnel tracking
signup_completed	Account created	Conversion tracking
onboarding_started	Profile flow begins	Onboarding funnel
onboarding_completed	Profile saved	Activation metric
checklist_generated	User tasks created	Core product activation
dashboard_viewed	Dashboard opened	Repeat engagement
task_opened	Task detail viewed	Task interest
task_completed	User completes task	Progress tracking
guide_viewed	Guidance article opened	Content value
reminder_clicked	Email link clicked	Reminder usefulness
document_helper_used	AI/helper opened	AI demand
support_ticket_created	User asks for support	Pain point tracking
partner_enquiry_submitted	Partner form completed	B2B demand

Product Metrics

Metric	Why It Matters
Onboarding completion rate	Shows whether setup is too long or confusing
Task completion rate	Shows whether users act on guidance
Top incomplete tasks	Identifies confusion or friction
Guide views by category	Shows content demand
Return within 7 days	Shows product stickiness
Reminder click rate	Shows reminder value
Support categories	Reveals user pain points
City/university clusters	Helps decide content expansion

B2B Reporting Metrics

Default B2B reporting should be anonymised and aggregated.

Possible B2B metrics:

- percentage of cohort completing first-week tasks;
- most delayed tasks;

- top confusion categories;
- guidance pages most used;
- common support questions;
- readiness score range;
- city/accommodation issue trends.

Content Intelligence Loop

User behaviour should feed content operations.

Examples:

- task with low completion becomes explainer content;
- repeated support question becomes FAQ;
- top searched guide becomes social video;
- city cluster becomes city pack;
- partner demand becomes B2B pitch angle.

Privacy Controls

- Avoid storing unnecessary raw text.
- Use aggregated reporting for partners.
- Do not expose individual user progress by default.
- Respect opt-outs where relevant.
- Keep analytics cookie/consent approach aligned with policy.

MVP Dashboard

Admin analytics v1 should show:

- total users;
- onboarding completion;
- task completion summary;
- top overdue tasks;
- top guide pages;
- support ticket categories;
- city/university counts;
- waitlist/partner enquiry counts.

End of document.

QA, Testing & Acceptance Criteria Manual

Feature tests, compliance tests, AI tests, mobile checks, and release gates

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines the tests NewStart UK must pass before release. It is especially important because vibe-coded applications can look polished while hiding logic, privacy, and edge-case failures.

QA Principle

A feature is not complete because it appears on screen. It is complete when it works correctly, safely, responsively, and within the approved MVP scope.

Core Test Areas

Authentication

- User can sign up.
- User can log in.
- User can log out.
- Protected pages block unauthenticated users.
- Admin pages block non-admin users.

Onboarding

- Required fields validate correctly.
- Arrival date accepts valid dates.
- User can edit profile later.
- Missing optional fields do not break task generation.

Checklist Generation

- Pre-arrival users receive PRE tasks.
- Newly arrived users receive D1/D7 tasks.
- Arrived 8-30 days users receive D30 tasks.
- Private rental users receive tenancy/deposit warnings.
- Work-interested users receive work-readiness tasks.
- Task dependencies display correctly.

Dashboard

- Readiness score displays.
- Progress updates after task completion.
- Urgent tasks are prioritised.
- Empty states are helpful.

Guidance Library

- Every linked guide opens.
- Sensitive guides show disclaimers.
- Source-needed flags are visible to admin.

Admin

- Admin can create/edit/deactivate tasks.
- Admin can edit guidance pages.
- Admin changes do not corrupt user task records.
- Non-admin users cannot access admin routes.

AI / Document Helper

- AI displays disclaimer.
- AI refuses regulated advice.
- AI asks user not to paste highly sensitive data where appropriate.
- AI escalates legal/immigration/medical/financial/housing decisions.

Mobile and Accessibility

- Screens work on common mobile widths.
- Buttons are tappable.
- Text is readable.
- Forms have labels.
- Warning states are not colour-only.

Compliance Tests

Every sensitive page must pass:

- disclaimer visible;
- no guaranteed outcome wording;
- no official-authority impersonation;
- source/signposting note included;
- escalation route included where needed.

Release Gate

Do not release publicly unless:

- critical auth flows pass;
- checklist generation passes core scenarios;
- admin access is protected;
- mobile dashboard is usable;
- privacy-sensitive features are disabled or controlled;
- disclaimers are visible;
- no out-of-scope claims appear on landing page or product screens.

Bug Severity

Severity	Definition	Action
Critical	Data leak, auth bypass, harmful guidance, payment issue	Block release
High	Broken onboarding, wrong task generation, admin bug	Fix before release
Medium	UI issue, confusing copy, non-critical flow friction	Fix before pilot if possible
Low	Cosmetic or minor content issue	Log and schedule

End of document.

Deployment, DevOps & Environment Setup Guide

Hosting, environment variables, migrations, monitoring, backups, and release checklist

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK should be deployed and operated technically during MVP development and pilot.

Recommended Deployment Stack

Area	Tool
Frontend hosting	Vercel
Database/auth	Supabase
Email	Resend
Repo	GitHub
Error logging	Sentry or Vercel logs initially
Analytics	Privacy-conscious product analytics

Environments

Use at least two environments:

- Development: local machine.
- Production: public pilot deployment.

Preferred later:

- Staging: before production releases.

Environment Variables

Suggested variables:

```
NEXT_PUBLIC_SUPABASE_URL=  
NEXT_PUBLIC_SUPABASE_ANON_KEY=  
SUPABASE_SERVICE_ROLE_KEY=  
RESEND_API_KEY=  
APP_BASE_URL=  
OPENAI_API_KEY=  
ADMIN_EMAILS=
```

Rules:

- never commit secrets;
- use Vercel environment variable manager;
- rotate keys if exposed;
- restrict service-role usage to server-only code.

Database Migrations

- Use SQL migration files.
- Keep schema changes versioned.
- Test migrations on development before production.
- Back up before destructive changes.

Backup Policy

MVP recommendation:

- daily Supabase backups if available;
- manual export before major migrations;
- store schema migrations in GitHub;
- document restore process.

Logging

Log:

- auth errors;
- task generation errors;
- email send failures;
- admin changes;
- AI helper errors;
- support ticket creation.

Do not log:

- passwords;
- full document text;
- sensitive personal documents;
- bank/login details;
- unnecessary personal data.

Release Checklist

Before each production release:

- run tests;
- check environment variables;
- confirm database migrations;
- test signup/login;
- test onboarding;
- test checklist generation;
- test admin access;
- review visible disclaimers;
- test mobile dashboard;
- confirm no debug keys or secrets are exposed.

Rollback Plan

For MVP:

- keep previous deployment available in Vercel;
- use database backup if migration causes issue;
- disable problematic feature flag where possible;

- notify users if issue affects data or safety.

Security Notes

- Use Supabase row-level security.
- Separate admin and user permissions.
- Avoid storing sensitive documents in MVP.
- Protect admin routes server-side.
- Use HTTPS only.

End of document.

AI Governance & Prompt Manual

Document Helper, admin AI, compliance checker, refusal rules, and prompt templates

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document controls AI behaviour in NewStart UK. It defines what AI can do, what it must not do, and the prompts needed for safe implementation.

AI Principle

AI supports clarity and operations. It must not replace official sources, qualified professionals, or user decision-making in sensitive matters.

AI Features

Feature	Status	Role
Document Helper Lite	MVP beta/placeholder	Simplify text, explain terms, highlight missing fields
FAQ Assistant	MVP+	Answer general settlement questions using approved content
Admin AI Copilot	Later	Draft content, summarise tickets, propose reports
Compliance Checker	Later	Flag risky content before publishing
Social Content Assistant	Later	Draft social posts within brand/safety rules

Universal AI Restrictions

AI must not:

- give legal advice;
- give immigration advice;
- give financial or tax advice;
- give medical advice or diagnosis;
- decide eligibility;
- guarantee outcomes;
- submit forms automatically;
- recommend regulated products as "best" without appropriate compliance;
- pretend to be human, official, or qualified professional.

Document Helper System Prompt

You are Nia, the NewStart UK AI-assisted guide. Your role is to explain general settlement-related text in plain English, hi

Refusal Pattern

Use this structure:

1. Acknowledge the request.
2. Explain the boundary.
3. Provide general safe information if possible.
4. Signpost to official/qualified help.

5. Offer a safer alternative such as checklist preparation.

Admin AI Prompt Pattern

You are an internal NewStart UK admin assistant. Draft operational content in plain English using the approved brand voice.

Compliance Checker Prompt

Review this NewStart UK content for compliance and trust risk. Flag any legal, immigration, financial, tax, medical, housing

AI Logging Rules

- Log feature used, timestamp, user ID, and risk category where needed.
- Avoid storing full sensitive text.
- Mask personal identifiers where possible.
- Retain logs only as long as needed.

Human Review Triggers

AI output requires human review when it covers:

- visa/right-to-work conditions;
- council tax liability;
- tenancy dispute;
- health/medical issue;
- financial product decision;
- partner complaint;
- potential scam or exploitation;
- any user distress or urgent risk.

Final AI Rule

AI should make users clearer, safer, and better prepared. It should never make them falsely confident about sensitive decisions.

End of document.

Content & Knowledge Base Operations Manual

Guidance pages, city packs, university packs, review workflows, and content templates

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK creates, reviews, updates, and manages its knowledge base.

Content Principle

Content should be plain-English, practical, source-aware, and task-linked. Each guidance page should help the user complete a specific step or avoid a specific mistake.

Content Types

Type	Purpose
Guidance page	Explains a specific task
City pack	Local transport, services, communities, warnings
University pack	Institution-specific onboarding steps
FAQ	Answers repeated questions
Scam alert	Warns about common risks
Email reminder	Prompts timely action
Lead magnet	Converts social/SEO traffic
Partner content	Explains approved partner offers

Guidance Page Template

Each guidance page should include:

1. What this is.
2. Why it matters.
3. What to prepare.
4. Steps to take.
5. Common mistakes.
6. Safety warning where relevant.
7. Official/source signposting.
8. Disclaimer.
9. Related checklist tasks.
10. Last reviewed date.

City Pack Template

- city overview;
- airport/transport route notes;
- local transport options;
- student/community areas;
- GP/local health signposting;
- council/local admin signposting;
- accommodation cautions;

- supermarkets/pharmacies;
- emergency support;
- local student/community groups.

University Pack Template

- enrolment/check-in steps;
- international office links;
- student status letter process;
- accommodation office/support;
- student union;
- wellbeing support;
- careers service;
- key arrival dates;
- official source links.

Content Review Workflow

1. Draft content.
2. Check brand voice.
3. Check compliance boundaries.
4. Add source/signposting.
5. Add disclaimer where sensitive.
6. Human review.
7. Publish.
8. Set review date.

Content Update Triggers

Update content when:

- official source changes;
- users report confusion;
- support tickets repeat same issue;
- partner provides verified update;
- social comments reveal a new pain point;
- content has not been reviewed within its review cycle.

First 20 Content Pages

Start with the first 20 guidance pages from the checklist document: pre-arrival, first 24 hours, accommodation, housing scams, bank prep, GP, NHS basics, council tax, student status letter, SIM/eSIM, transport, budgeting, tenancy, deposit checks, part-time work, NI number, right-to-work/share code, job scams, emergency contacts, and 90-day review.

Content Quality Rule

Every page should answer: What should the user do next, what should they avoid, and where should they go for official or qualified help?

End of document.

Source Library & Official Reference Register

Official source tracking, review dates, content ownership, and evidence rules

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document controls source quality. NewStart UK must not rely on memory or outdated assumptions for sensitive guidance.

Source Principle

When guidance touches official processes, rights, obligations, healthcare, work, documents, housing, or finance, it should be linked to an official or reputable source and reviewed regularly.

Source Categories

Category	Preferred Sources
Immigration/eVisa/share code	GOV.UK
Right to work	GOV.UK
GP/NHS	NHS official pages
Council tax	UKCISA, local council, GOV.UK where relevant
Housing/deposit	GOV.UK, Shelter, local council guidance
Student guidance	University official pages, UKCISA
Banking	Bank official pages, neutral FCA-style sources where relevant
Jobs/scams	GOV.UK, Action Fraud, university careers pages
Local services	Official council/university/local provider pages

Source Register Fields

Field	Description
source_id	Stable source ID
title	Source title
organisation	GOV.UK, NHS, UKCISA, university, council, etc.
URL	Official link
topic	GP, housing, bank, council tax, etc.
used_in	Guidance pages/tasks using this source
last_checked	Date last verified
next_review	Date to recheck
owner	Person/team responsible
risk_level	Low, Medium, High
notes	Summary of relevance

Review Frequency

Risk Level	Review Frequency
High	Monthly or whenever rules change
Medium	Quarterly
Low	Twice yearly

High-Risk Topics

Mark these high risk:

- visa/eVisa/share code;
- right to work;
- council tax;
- GP/NHS eligibility/access;
- tenancy/deposit;
- NI number;
- scams/fraud;
- financial products;
- employment restrictions.

Source Use Rules

- Do not copy long text from sources.
- Paraphrase in plain English.
- Link/signpost to official source.
- Include last-reviewed date on sensitive guidance pages.
- If source is unclear, label content for human review.

Outdated Source Process

If a source may be outdated:

1. Unpublish or flag the affected guidance.
2. Add "review required" status.
3. Replace with official updated source.
4. Log update in content operations.
5. Notify affected admins/support if relevant.

Final Source Rule

Accuracy is part of the product. A beautifully designed app with outdated guidance is a trust risk.

End of document.

Multilingual & Accessibility Strategy

Plain English, translation, inclusive UX, and accessibility principles

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK should support users with different English confidence levels, accessibility needs, and cultural contexts.

Core Principle

The MVP should start with clear plain English. Multilingual support should be added carefully so translated content does not distort sensitive guidance.

Plain-English Rules

- Use short sentences.
- Explain UK-specific terms.
- Avoid jargon.
- Use examples.
- Avoid idioms.
- Put the next step near the top.
- Repeat disclaimers on sensitive pages without overwhelming the user.

Key Terms to Explain

Examples:

- GP;
- NHS 111;
- council tax;
- student status letter;
- tenancy;
- deposit protection;
- arrears;
- share code;
- right to work;
- National Insurance number;
- full-time student exemption;
- guarantor;
- utilities.

Accessibility Principles

- Mobile-first responsive design.
- High colour contrast.
- Large tap targets.
- Form labels for screen readers.
- Text alternatives for icons.

- Keyboard navigation.
- Clear error messages.
- Warning icons plus text, not colour alone.
- Avoid flashing or distracting animation.

Multilingual Roadmap

Stage	Action
MVP	Plain English and key term explanations
MVP+	Translate key terms and short summaries
Phase 2	Add language-specific guide summaries
Phase 3	Community-reviewed translations for priority languages

Translation Safety

Translated content must preserve:

- disclaimer meaning;
- eligibility uncertainty;
- source signposting;
- warning tone;
- no-guarantee language.

Priority Language Selection

Choose languages based on:

- user signups;
- university intake patterns;
- support ticket demand;
- ambassador availability;
- community partner input.

Inclusive Design

NewStart UK should not assume users:

- know UK systems;
- have strong English;
- have permanent accommodation;
- have stable income;
- understand local abbreviations;
- are comfortable asking institutions for help.

Final Accessibility Rule

A user should be able to understand their next step even if they are tired, anxious, on a phone, and reading in a second language.

End of document.

Social Media, Acquisition & Community Growth Engine

Content-led growth, Hormozi-style loop, channel strategy, and launch calendar

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document turns NewStart UK into a content-led acquisition system. It defines how social content attracts users, builds trust, converts attention, and feeds product intelligence.

Growth Positioning

NewStart UK owns this content territory:

"We help people coming to the UK avoid confusion, delays, scams, and costly first-90-day mistakes."

Audience Segments

Audience	Content Angle
Incoming international students	What to do before and after arriving
Current international students	Mistakes to fix before they cost money
Parents/sponsors	How to help your child settle safely
Education agents	Add post-admission support
Universities/student unions	Reduce repetitive arrival questions
Accommodation providers	Help tenants arrive prepared
Skilled workers	UK arrival and admin setup made simpler

Content Pillars

Pillar	Examples
First 90 Days	First 7 days checklist, arrival day tasks
Mistake Prevention	Housing deposit checks, job scam warnings
Document Help	Student status letter, GP forms, council letters
Money & Budgeting	First month budget, bank prep
Health & GP	Register early, NHS basics
Work Readiness	CV, NI number awareness, right-to-work basics
City/University Guides	Luton, London, Manchester, university packs

NewStart Growth Loop

Scout

Collect real questions from Reddit, TikTok comments, Facebook groups, WhatsApp groups, support tickets, Google searches, student interviews, university FAQs, and agent questions.

Architect

Turn questions into checklists, posts, carousels, guides, lead magnets, and app tasks.

Megaphone

Distribute through TikTok, Instagram, YouTube Shorts, LinkedIn, Facebook groups, WhatsApp broadcast, email, and community partners.

Closer

Convert attention into waitlist signups, guide downloads, app signups, partner pilot requests, affiliate clicks, or support calls.

Loop

Use comments and DMs to update FAQs, checklist tasks, guidance pages, and product roadmap.

Channel Strategy

Channel	Role
TikTok	Awareness and student pain points
Instagram	Carousels, stories, community trust
YouTube Shorts	Evergreen explainers
LinkedIn	B2B universities, agents, employers
Facebook Groups	Student/community distribution
WhatsApp	Retention and reminders later
Email	Waitlist nurturing and lead magnets

Weekly Workflow

Day	Activity
Monday	Research questions and pain points
Tuesday	Draft 10-20 content ideas
Wednesday	Produce videos/carousels
Thursday	Schedule and write captions
Friday	Engage comments and DMs
Saturday	Convert top questions into FAQs/checklist updates
Sunday	Review analytics and plan next week

Nia on Social Media

Nia can present general tips, reminders, and explainers, but must be disclosed as AI-assisted. Real humans should carry testimonials, founder updates, partner trust, and sensitive stories.

30-Day Launch Content Themes

Week 1: Before arrival.

Week 2: Arrival week and safety.

Week 3: Bank, GP, council tax, documents.

Week 4: Jobs, budgeting, housing, 90-day review.

Social Media Prompt

Create a short-form social post for NewStart UK. Audience: international students coming to the UK. Tone: calm, practical, p

Final Growth Rule

Social media is not just marketing. It is a listening system that reveals what the product should build next.

End of document.

SEO, Landing Page & Lead Magnet Strategy

Search content, conversion pages, downloadable assets, and waitlist funnel

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK should attract search traffic, convert visitors, and build an early waitlist through useful lead magnets.

SEO Positioning

NewStart UK should rank for practical settlement questions, not broad inspirational topics.

Content clusters:

- international student arrival checklist;
- first 90 days in the UK;
- UK student bank account preparation;
- GP registration for students;
- council tax student exemption basics;
- housing scam warning for students;
- UK arrival budget planner;
- city/university arrival packs.

Landing Page Structure

The main landing page should include:

1. Hero headline.
2. Problem statement.
3. Solution summary.
4. How it works.
5. Key features.
6. Who it is for.
7. Student benefits.
8. Partner benefits.
9. AI support disclosure.
10. Pricing teaser.
11. Waitlist CTA.
12. Partner CTA.
13. Trust/safety disclaimer.

Lead Magnets

Start with downloadable or interactive assets:

- UK First 7 Days Checklist.
- International Student 90-Day Roadmap.
- Housing Scam Warning Checklist.
- Bank Account Document Prep Checklist.

- GP Registration Starter Guide.
- Council Tax Letter Explainer.
- UK Arrival Budget Planner.
- Student Job Scam Warning Sheet.
- City Arrival Packs.
- Parent/Sponsor Guide.

Lead Magnet Form Fields

- name;
- email;
- arrival type;
- city;
- university if student;
- expected arrival date;
- biggest concern;
- consent to receive updates.

SEO Page Template

Each SEO page should include:

- plain-English intro;
- who it is for;
- step-by-step guidance;
- mistakes to avoid;
- checklist download CTA;
- source/signposting note;
- disclaimer;
- related pages.

Conversion Funnel

1. Social or search visitor lands on useful content.
2. Visitor downloads checklist or joins waitlist.
3. Email sequence sends practical value.
4. User signs up for app access.
5. User completes onboarding.
6. User gets personalised checklist.
7. User may upgrade or refer others.

Landing Page Copy Prompt

Write landing page copy for NewStart UK. Audience: international students coming to the UK and organisations supporting new

SEO Rule

Every SEO page must help the user do one practical thing better. Avoid content that is broad, generic, or unsupported.

End of document.

Commercial, Partner & Revenue Operations Framework

B2C, B2B, affiliate, premium support, partner verification, and pricing logic

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document turns NewStart UK monetisation into an operating model.

Revenue Strategy

NewStart UK should use layered revenue:

1. B2C plans.
2. Premium human support.
3. B2B pilot packages.
4. B2B2C institutional distribution.
5. Affiliate/referral revenue.
6. Verified partner marketplace.
7. White-label or co-branded portals later.

B2C Pricing Draft

Plan	Price	Features
Free	£0	Basic checklist and guidance
Starter	£9.99	Personalised roadmap and reminders
Plus	£24.99	Document helper, city guide, mistake alerts
Premium	£49-£99	Human support/review session
Family Pack	£79-£149	Multi-person guidance later

B2B Pilot Pricing Draft

Offer	Price
Small partner pilot	£500-£1,000 setup + revenue share
Student onboarding pilot	£2,500 setup + £5 per active student
Annual licence later	£5,000-£50,000 depending on size
White-label later	Custom

Premium Support Services

Potential services:

- student arrival planning call;
- document-readiness review;
- housing-readiness review;
- family relocation planning;
- employer relocation support.

Affiliate Categories

Category	Revenue Type	Risk Level
SIM/eSIM	Commission	Low

Category	Revenue Type	Risk Level
Money transfer	Affiliate	Medium
Insurance	Affiliate	Medium
Airport pickup	Commission	Medium
Temporary accommodation	Commission/lead	High
Student storage	Commission	Low
CV/job support	Referral	Medium
Legal/immigration firms	Referral only	High
Recruitment agencies	Lead/referral	High

Affiliate Rules

- disclose paid relationships;
- do not rank purely by commission;
- allow users to choose alternatives;
- vet partners;
- track complaints;
- remove unsafe partners.

Partner Verification

Partner checks:

- company registration;
- website/contact details;
- pricing transparency;
- refund policy;
- complaints process;
- online reputation;
- safeguarding concerns;
- service suitability;
- risk category;
- review date.

Revenue Operations Workflow

1. Identify partner category.
2. Run verification checklist.
3. Agree commercial terms.
4. Create partner listing.
5. Add disclosure.
6. Track clicks/leads/conversions.
7. Monitor complaints.
8. Review partner quarterly.

Commercial Guardrail

If a partner offer could harm user trust, reject it even if commission is attractive.

End of document.

Ambassador, Referral & Community Programme

Student ambassadors, referral loops, community rules, and testimonial strategy

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK can grow through real people, communities, referrals, and trust-based advocacy.

Programme Principle

AI can scale content, but real humans build trust. Ambassadors should extend NewStart UK into universities, cities, and communities without giving regulated advice.

Ambassador Types

Type	Role
Student ambassador	Share checklists, collect questions, create content
City ambassador	Provide local insights and content ideas
University ambassador	Help tailor university-specific packs
Community ambassador	Connect faith/cultural/community groups
Partner ambassador	Represent approved institutions or organisations

Ambassador Responsibilities

- share official NewStart content;
- collect newcomer questions;
- refer users to waitlist/app;
- report common issues;
- help validate city/university packs;
- appear in approved testimonials or content.

Ambassador Boundaries

Ambassadors must not:

- give legal, immigration, medical, financial, tax, or housing advice;
- pretend to be official representatives of government/university unless authorised;
- collect sensitive documents;
- charge users privately using the NewStart name;
- promote unverified partners;
- guarantee outcomes.

Referral Programme Ideas

Referral Action	Reward Idea
Refer a student	Free Plus access or discount
Refer 5 students	Premium guide/session discount
Refer partner lead	Commission or referral bonus after conversion
Ambassador monthly activity	Stipend, certificate, public recognition

Community Channels

Potential channels:

- WhatsApp broadcast;
- Telegram group/channel;
- Instagram community;
- Facebook groups;
- email newsletter;
- university society partnerships.

Community Moderation Rules

- no fake jobs;
- no unverified accommodation offers;
- no payment requests;
- no document collection;
- no harassment;
- no regulated advice;
- no spam links;
- report scams quickly.

Testimonial Collection

Only use testimonials with consent. Avoid fake or AI-generated testimonials. Collect:

- name or initials;
- city/university if consented;
- problem before NewStart;
- result after using NewStart;
- permission scope.

Community Success Metrics

- referrals;
- ambassador signups;
- questions collected;
- city/university pack contributions;
- waitlist conversions;
- content shares;
- partner introductions.

Final Community Rule

Community must make newcomers safer and clearer, not expose them to more scams.

End of document.

Pilot & Validation Playbook

User research, partner validation, prototype tests, success metrics, and decision gates

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK should validate demand before heavy build or scale.

Validation Goal

Prove that newcomers and partner organisations experience the settlement problem strongly enough to use or pay for NewStart UK.

Validation Audiences

Interview:

- 10 international students already in the UK;
- 10 incoming students;
- 3 education agents;
- 2 university/student support staff;
- 2 accommodation providers;
- 2 employers/recruiters or care recruiters;
- 2 community/church/student society leaders.

Student Interview Questions

1. What confused you most before arrival?
2. What confused you most in your first week?
3. What cost you money or time?
4. Which tasks were hardest: bank, GP, housing, council tax, SIM, transport, jobs, documents?
5. What did your university/agent explain well?
6. What did they not explain well?
7. Would a 90-day personalised checklist have helped?
8. Would reminders have helped?
9. Would you pay £9.99, £24.99, or £49 for different levels of support?
10. Would you trust AI document explanation if clearly limited?

Partner Discovery Questions

1. How do you currently support newcomers?
2. What repeated questions create workload?
3. Which arrival problems cause the most complaints?
4. Would a structured onboarding portal help?
5. What would you pay for a pilot?
6. What anonymised insights would be useful?
7. What would make you trust the platform?
8. Would you pilot with 50-500 users?

Prototype Test Tasks

Ask users to:

- sign up;
- complete onboarding;
- view dashboard;
- find top three tasks;
- open a guide;
- mark a task complete;
- review Document Helper concept.

Pilot Structure

Student Pilot

- 50-100 users.
- 30 days.
- Free or low-cost beta.
- Weekly feedback.

Partner Pilot

- one agent/community/university/accommodation partner;
- 100-500 users if available;
- anonymised summary report;
- testimonial/case study if successful.

Success Metrics

Metric	Strong Signal
Onboarding completion	70%+
Users completing 3+ tasks	60%+
Return within 7 days	30%+
Users saying it reduced stress/confusion	70%+
Willingness to pay	20%+ show paid interest
Partner pilot interest	3+ serious leads

Decision Gates

After pilot, decide:

- continue student-only or add worker/family segment;
- launch paid plan or remain beta;
- prioritise B2C or B2B;
- build AI helper now or later;
- add WhatsApp reminders or keep email first.

Validation Rule

Do not scale features until users repeatedly return because NewStart helps them know what to do next.

End of document.

Customer Support & Escalation SOP

Support categories, response templates, escalation routes, and sensitive issue handling

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how NewStart UK should respond to user questions, concerns, and support tickets.

Support Principle

Support should be helpful, calm, and clear while respecting the boundary between general guidance and regulated advice.

Support Categories

Category	Examples	Default Action
Account	Login, password, profile	Technical support
Checklist	Task confusion, progress issue	Explain feature/guidance
Documents	Form/letter confusion	Explain generally, signpost if sensitive
Housing	Deposit, landlord, contract	Scam warning + signpost, no legal advice
Health	GP/NHS questions	General signposting, no diagnosis
Work	CV, NI, right-to-work awareness	General guidance, official signposting
Council tax	Student exemption/letters	General explanation, signpost council/university
Partner complaint	Bad service	Escalate internally
Scam concern	Fake job/landlord/payment	High priority support
Payment/refund	Subscription later	Billing support

Response Template

1. Acknowledge the issue.
2. Provide general guidance or product help.
3. State limitation if sensitive.
4. Signpost official/qualified support.
5. Offer the next safe step.
6. Log category and escalation if needed.

Escalation Triggers

Escalate to human review when:

- potential fraud/scam is reported;
- user may lose housing;
- formal legal/council/immigration letter is involved;
- health urgency is mentioned;
- user reports abuse, threats, exploitation, or distress;
- partner complaint is serious;
- AI produced a questionable response;
- user asks for regulated advice.

Standard Sensitive Reply

"I can help explain the general meaning and suggest safe next steps, but NewStart UK cannot provide legal, immigration, financial, tax, medical, or housing advice. For this issue, please check the official source or speak to a qualified professional."

Partner Complaint Process

1. Acknowledge complaint.
2. Record partner, issue, evidence if provided.
3. Do not promise outcome.
4. Escalate internally.
5. Pause partner promotion if risk is serious.
6. Follow up with user where appropriate.

Scam Concern Process

1. Advise user not to send more money/details.
2. Encourage saving evidence.
3. Signpost official reporting/support routes.
4. Log scam type.
5. Add content warning if pattern repeats.

Support Metrics

- tickets by category;
- response time;
- escalations;
- repeated issues;
- unresolved tickets;
- partner complaints;
- content gaps discovered.

Final Support Rule

When in doubt, do not improvise sensitive advice. Explain the boundary and signpost safely.

End of document.

NewStart UK

Document 26

Volume 6 - Operations, Pilot & Scale

Admin Operations Manual

Internal routines for content, users, checklist updates, AI review, partners, and reporting

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document defines how the NewStart UK team should operate the platform after MVP launch.

Admin Roles

Role	Permissions
Super Admin	All settings, users, content, tasks, partners
Content Admin	Guidance pages, city/university packs, FAQs
Support Admin	Support tickets and user assistance
Partner Admin	Partner records, verification, affiliate links
Analyst	Aggregated analytics only

Weekly Admin Routine

Day	Activity
Monday	Review user/task analytics
Tuesday	Review support tickets and repeated issues
Wednesday	Update guidance pages and FAQs
Thursday	Review partner leads/complaints
Friday	Publish content updates and social insights
Sunday	Prepare weekly summary and next priorities

Checklist Operations

Admins should:

- review top overdue tasks;
- identify confusing tasks;
- update guidance links;
- deactivate outdated tasks;
- add source review flags;
- avoid changing task IDs once in use.

Content Operations

- Draft content in approved template.
- Check source register.
- Add disclaimer if sensitive.
- Mark last-reviewed date.
- Publish after review.

AI Operations

- Review AI helper logs for risk patterns.
- Update prompts when unsafe outputs are found.

- Disable AI feature if repeated critical issues occur.
- Maintain refusal/escalation patterns.

Partner Operations

- Review new partner applications.
- Run verification checklist.
- Add affiliate disclosure.
- Monitor user complaints.
- Suspend partner if safety risk arises.

Reporting

Monthly internal report should include:

- users;
- activation rate;
- top tasks;
- top support issues;
- content updates;
- partner performance;
- risk incidents;
- next actions.

Admin Security

- Use role-based access.
- Remove inactive admins.
- Do not share admin passwords.
- Log sensitive admin actions.
- Use least-privilege permissions.

Final Admin Rule

The admin system should let NewStart evolve content and operations quickly without needing developers for every update.

End of document.

Risk Register & Crisis Response Plan

Operational, compliance, AI, partner, social, and data incident response planning

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document identifies major risks and defines how NewStart UK should respond to incidents.

Risk Register

Risk	Impact	Likelihood	Mitigation
Wrong guidance	User harm, reputation damage	Medium	Source review, disclaimers, human review
AI hallucination	Misleading user	Medium	AI guardrails, logs, escalation
Data incident	Legal/reputation risk	Low/Medium	Privacy-by-design, access controls
Bad partner	User harm, trust loss	Medium	Verification, complaint process
Affiliate overclaim	Regulatory/trust risk	Medium	Disclosure and copy review
Social backlash	Reputation issue	Medium	Crisis response, factual correction
Fake NewStart account	Scam risk	Medium	Verified channels, reporting
B2B overpromise	Partner disappointment	Medium	Sales claims must match roadmap
Outdated sources	Incorrect guidance	Medium	Source register review
Admin misuse	Data/trust risk	Low/Medium	Role permissions and audit logs

Crisis Severity

Level	Example	Response
Level 1	Minor typo or content issue	Fix and log
Level 2	User complaint or inaccurate page	Review, correct, notify if needed
Level 3	Bad partner/scam pattern	Suspend listing, investigate, warn users if needed
Level 4	Data incident or harmful advice	Incident response, legal/privacy review, user communication

Crisis Response Steps

1. Identify and classify issue.
2. Pause affected feature/content/partner if necessary.
3. Preserve evidence and logs.
4. Assign owner.
5. Draft response using approved tone.
6. Correct issue.
7. Notify affected users/partners if needed.
8. Document root cause.
9. Update processes to prevent repeat.

Public Response Tone

- calm;
- transparent;
- factual;

- non-defensive;
- user-safety focused;
- no blame shifting;
- no unsupported claims.

AI Incident Response

If AI gives risky guidance:

- disable or restrict relevant prompt/feature;
- review logs;
- update prompt guardrails;
- add test case;
- notify users only if risk materially affected them.

Partner Incident Response

If partner is accused of harmful behaviour:

- pause promotion if credible risk;
- gather facts;
- contact partner;
- protect user safety first;
- update verification status;
- remove if unresolved or serious.

Final Crisis Rule

Speed matters, but accuracy and user protection matter more.

End of document.

B2B Sales, Proposal & Account Management Playbook

University, agent, employer, accommodation, and partner sales workflows

v1.2 | May 2026

Prepared for product strategy, vibe coding, operations, trust governance, and growth execution.

Purpose

This document helps NewStart UK sell to institutions without overpromising. It supports universities, education agents, accommodation providers, employers, care recruiters, and community organisations.

B2B Positioning

NewStart UK helps organisations reduce repetitive newcomer support questions by giving users a structured, personalised onboarding journey.

Target B2B Segments

Segment	Pain	Offer
Universities	Repetitive student arrival questions	Student onboarding pilot
Education agents	Lack of after-admission support	Post-admission support package
Accommodation providers	Tenant confusion, documents, arrival issues	Tenant onboarding assistant
Employers	Overseas worker relocation friction	Worker onboarding package later
Care recruiters	Overseas staff settlement	Health/care worker journey later
Community organisations	Informal newcomer support burden	Structured guidance portal

Discovery Questions

- How many newcomers do you support yearly?
- What questions repeat most often?
- Which arrival tasks cause delays or complaints?
- How do you currently communicate checklists?
- Would reminders reduce support workload?
- What data/insights would help your team?
- What would make you trust a pilot?
- What budget or payment model is realistic?

Pilot Proposal Structure

1. Executive summary.
2. Partner problem.
3. NewStart solution.
4. Pilot scope.
5. User journey.
6. Partner benefits.
7. Data/privacy boundaries.
8. Timeline.
9. Pricing.
10. Success metrics.
11. Next steps.

Pilot Offer

Suggested student pilot:

- setup: £2,500;
- active user fee: £5 per student;
- pilot duration: 60-90 days;
- includes: branded access link, student onboarding roadmap, reminders, guidance, anonymised report.

Small partner option:

- setup: £500-£1,000;
- revenue share or per-user pricing;
- limited reporting.

Sales Claim Boundaries

Do not say:

- "We guarantee fewer complaints."
- "We provide immigration advice."
- "We solve all student settlement issues."
- "We replace your student support team."

Say:

- "We help structure and reduce repetitive arrival confusion."
- "We provide general settlement guidance and signposting."
- "We can support your existing onboarding process."
- "We provide anonymised insight reports where privacy rules permit."

Follow-Up Email Template

Subject: Structured arrival support for your international students

Hello [Name],

Thank you for discussing the support challenges faced by incoming students. NewStart UK helps students understand their first

For a pilot, we can support a defined cohort with a 90-day onboarding roadmap and provide anonymised insight into common stu

Would you be open to reviewing a short pilot proposal for [intake/cohort]?

Best regards,
[Name]

Account Management Routine

For active partners:

- monthly check-in;
- report common issues;
- review content updates;
- discuss user feedback;
- identify next cohort;

- review renewal/expansion.

Final Sales Rule

Sell the real value: clarity, structure, support, and insight. Do not sell fantasy automation or overstate what the MVP can do.

End of document.
